REGULAR MEETING

DEPARTMENT HEAD

INFO. TECH

Jim Goeben, IT Director explained that the video surveillance footage from the Kittitas County Courthouse, the Public Safety Building, and the Sheriff's Office is stored on a redundant hard drive array in the IT datacenter. He stated that when the surveillance system was initially configured, a balance was made between video quality, retention, and available storage capacity. He stated that with the retention a majority of the cameras were set to retain footage for 30 days and subsequently the Sheriff's office made change requests to reduce retention to 7 or 14 days in order to increase quality and add cameras. He stated that the Sheriff's Office is requesting IT to increase the retention time for all cameras to 30 days. He explained that they have also asked about increasing the video resolution on some cameras to capture more detail and either request would require more storage space.

Mr. Goeben reviewed concerns the Board should consider as well as options. He stated that it was IT's recommendation that the BoCC approve the request to purchase a redundant storage array to store surveillance video with retention of 30 days (being option #1). He reviewed advantages and disadvantages and explained that the budget impact for the County to purchase a redundant hard drive array, sufficient to retain video for 30 days and provide for anticipated future growth, would cost approximately \$4,268.16.

Commissioner Jewell moved to approve a General Fund expense of \$4,268.16 to purchase a redundant hard drive array, sufficient to retain video for 30 days and that will provide for anticipated future growth. Commissioner Osiadacz seconded. Motion carried 3-0.

Meeting adjourned at 10:00 a.m.
